

Introduction:

Fiberdyne Labs' LGX singlewide fusion splice module has a capacity of up to 12 fusion splices. The front panel supports up to 12 ports; available connector styles are SC/UPC, SC/APC, LC/UP and LC/APC. It comes pre-loaded with 1 meter, 900um, color coded pigtails and a rubber splice chip to secure splice sleeves (sleeves sold separately). This design protects and organizes fusion splices without the need for a splice tray.

Fiberdynes LGX singlewide fusion splice module will fit into Fiberdynes rack mount or wall mount distribution centers and panels or into other LGX compatible termination boxes.

Part Number	Description
FSM12SCU	Fusion Splice Module 12 Port SC/UPC
FSM12SCA	Fusion Splice Module 12 Port SC/APC
FSM12LCU	Fusion Splice Module 12 Port LC/UPC
FSM12LCA	Fusion Splice Module 12 Port LC/APC
